Introduction to Vol. II. Manufactures and Occupations, ... xv–lvi

TABULAR PRESENTATIONS.

I. Manufactures and Related Occupations, by Towns, . . . 1–186

The name of each Manufacture and Related Occupation, specified in a statement for each Town and City, with aggregates for each Town and City, Number of Establishments, Capital invested and Value of Goods made given in the case of Manufactures, and Number of Establishments, Capital invested and Value of Work done given for Related Occupations. Followed by Town and City, and County and State recapitulations for Manufactures and Occupations, and a County and State recapitulation by totals.

II. Manufactures and Related Occupations, by Name, . . . 187–230

Presentations of the principal Manufactures, giving for each the number of Establishments, Capital invested and Value of Goods made in each Town, City, County, and for the State. Followed by a presentation of other Important Manufactures for which State totals of Establishments, Capital invested and Value of Goods made are specified. This is followed by similar presentations, by State totals, of Miscellaneous Manufactures, and of all Occupations related to Manufactures. A recapitulation of State aggregates, for all industries, of Establishments, Capital invested and Value of Goods made and Work done, concludes.

Manufactures, ... 189–221

With Number of Establishments, Capital invested and Value of Goods made, for each Town, City, County, and for the State.

Arms and Ammunition, ... 189
Agricultural Implements, ... 189, 190
Artisans' Tools, ... 190, 191
Boots and Shoes, ... 192, 193
Boxes, ... 194
Carriages and Wagons, ... 195, 196
Clothing, ... 196–198

MANUFACTURES—Continued.

Cotton Goods, ... 198, 199
Food Preparations, ... 199–201
Furniture, ... 202
Leather, ... 203, 204
Liquors and Beverages, ... 204, 205
Lumber, ... 206, 207
Machines and Machinery, ... 208, 209
Metals and Metallic Goods, ... 209–211
Musical Instruments and Materials, ... 211, 212
Oils and Illuminating Fluids, ... 212
Paper, ... 213
Printing and Publishing, ... 214, 215
Stone, ... 215, 216
Tobacco, ... 216, 217
Wooden Goods, ... 218, 219
Woollen Goods, ... 219, 220
Worsted Goods, ... 221

OTHER IMPORTANT MANUFACTURES, ... 221, 222
With State totals of Number of Establishments, Capital invested and Value of Goods made.

Bags and Bagging, ... 221
Brushes and Brooms, ... 221
Building, ... 221
Carpetings, ... 221
Chemical Preparations, ... 221
Clocks and Watches, ... 221
Cotton and Woollen and other Textiles, ... 222
Dress Trimmings, ... 222
Drugs and Medicines, ... 222
Dyestuffs, ... 222
Fertilizers, ... 222
Fine Arts, ... 222
Glass, ... 222
Linen, ... 222
Print Works, ... 222
Polishes and Dressings, ... 222
Railroad Construction, ... 222
Rubber, ... 222
Scientific Instruments and Appliances, ... 222
Silk, ... 222
Vessels, ... 222

Page

Miscellaneous Manufactures, ... 223–225
With State totals of Number of Establishments, Capital invested and Value of Goods made for all Manufactures, not previously specified, of which returns were made, each industry being distinguished by its proper name.

Occupations, ... 226–228
With State totals of Number of Establishments, Capital invested and Value of Work done, for all Occupations related to Manufactures, of which returns were made, each industry being distinguished by its proper name.

State Recapitulation of Aggregates, ... 229
With State totals of the Number of Establishments, Capital invested and Value of Goods made and Work done for all Manufactures and Related Occupations.

III. Articles Made, by Name, ... 231–250
With each separate article of manufacture specified by name, and the total value of each given, for the State. In the majority of instances, the quantity of each article made is also given, accompanied by the average value of the unit of measurement.

IV. Stock Used, by Towns, ... 251–256
Number of Establishments, with Value of Stock used by them for each Town, City and County, with a County and State recapitulation.

V. Stock Used, by Industries, ... 257–262
Number of Establishments, with value of Stock used by them, classified by Industries.

VI. Selected Stock, by Towns, ... 263–282
Presentations, by name, of the principal articles of Stock used in Manufactures, giving the value of the amount consumed in the principal Towns and Cities; giving the quantity used, also, in some cases. With County and State recapitulations in the case of each article, and a consolidated recapitulation, with quantity and value, of the items of Stock considered, for the State.

SELECTED STOCK, BY TOWNS—Continued.

Building Stone, Brick, etc., ... 265
Cotton, ... 265, 266
Cotton Goods, ... 266, 267
Flax, Hemp and Jute, ... 268
Flour and Meal, ... 268, 269
Iron (pig and scrap), ... 269, 270
Iron (manufactured), Steel and other Metals, ... 270-272
Leather, ... 272-274
Lumber, ... 274-276
Paper, ... 277
Sugar, Syrup and Molasses, ... 278
Shoe Findings, ... 279
Wool, ... 280
Woollen and Worsted Goods, ... 281
State recapitulation, ... 282

VII. STOCK USED, BY NAME, ... 283-308

With each separate article of stock used specified by name, and the total value of each given, for the State. In the majority of instances, the quantity of each article used is also given, accompanied by the average value of the unit of measurement.

VIII. VALUES OF BUILDINGS USED FOR MANUFACTURING PURPOSES; OF AVERAGE STOCK ON HAND; OF ALL MACHINERY; AND OF IMPORTED MACHINERY: BY TOWNS, ... 309-316

Number of Establishments, Value of Buildings, Value of Average Stock on Hand, Value of Machinery and Value of Imported Machinery for each Town, City and County, with a County and State recapitulation.

IX. MOTIVE POWER, BY TOWNS, ... 317-326

Number of Establishments in which Motive Power is supplied by Steam Engines, Water Wheels, Horses, Hand, Foot and Windmills, in each Town, City and County, with County and State recapitulation, and classifications of the kinds of Steam Engines and kinds of Water Wheels.

X. STEAM AND WATER POWER, WITH NOMINAL AND ACTUAL HORSE POWER, BY TOWNS, ... 327-334

Number of Steam Engines with Nominal and Actual Horse Power and Number of Water Wheels with Nominal Horse Power, for each Town, City and County, with County and State recapitulation.

Page

XI. Steam and Water Power, with Nominal and Actual Horse Power, by Industries, ... 335–338

Number of Steam Engines with Nominal and Actual Horse Power and Number of Water Wheels with Nominal Horse Power, classified by Industries.

Steam Power, ... 337

Water Power, ... 338

XII. Persons Employed in Manufactures and Occupations, with Classification by Sex, Age, etc., by Towns, ... 339–360

This presentation gives the Whole Number of Persons Employed in Manufactures, in Related Occupations, and in Manufactures and Occupations combined, in each Town, City and County, with County and State recapitulations. Each of the three parts of the presentation also shows, in detail, the Number of Males Employed, the Number of Females, the Number of Married Females, the Numbers of Males and of Females between 10 and 15 years of age, the Numbers of Males and of Females under 10 years of age, the Number of Both Sexes, under 15, employed for more than nine months in the year ending May 1, 1875, and the Number of Women furnished with work at home, in each Town, City and County, with County and State recapitulations.

Manufactures, ... 341–346

Manufactures, State recapitulation, ... 347

Occupations, ... 347–352

Occupations, State recapitulation, ... 353

Manufactures and Occupations, ... 353–359

Manufactures and Occupations, State recapitulation, . . 359

XIII. Persons Employed and Wages, by Towns, ... 361–370

This presentation gives the Whole Number of Persons Employed in Manufactures and Related Occupations, of both sexes and all ages, for whom wages were returned by their Employers, and the total amount paid them as Wages during the year ending May 1, 1875, for each Town, City and County, with County and State recapitulation. It also gives, in detail, the Number of Males above 15 years of age and their total yearly wages, the Number of Females above 15 and their total yearly wages, and the Number of Persons of Both Sexes under 15 and their total yearly wages, for each Town, City and County and for the State; also, a table of County and State average yearly wages for all persons employed, and, in detail, for males above 15 years of age, females above 15, and persons of both sexes under 15.

Page

XIV. Persons Employed in Manufactures and Occupations, Wages, etc., by Industries, ... 371–754

This presentation is the counterpart of Presentation XIII., the Persons Employed being distributed by Towns under County subdivisions in that, and in this being distributed by Towns under a classification by Industries. Each showing for an Industry is divided into four parts, which are consecutively numbered. Each *Part I.* contains,—Whole Number of Persons Employed, and, in detail, Number of Males, Females, Married Females, Males above 15 years of age, Females above 15, Males from 10 to 15, Females from 10 to 15, Males under 10 and Females under 10; also, average number of hours worked per day in each Town and City, and the number of days that establishments were open. Each *Part II.* contains,—The Number of Males and Females for whom Working Time and Wages were given in each Town and City, the Total Wages paid them for the year ending May 1, 1875, and the Average Yearly Wages for Day Hands and for Piece Hands, in each case the age distinctions of Males above 15, Females above 15 and Both Sexes under 15, being maintained. Each *Part III.* contains,—The Number of Day and the Number of Piece Hands at work, with the usual age classification maintained, in each Town and City, and a statement of the actual number of days worked. Each *Part IV.* contains,—The Number of Day and the Number of Piece Hands at work, with the usual age classification maintained, in each Town and City, and a statement of the actual average daily wages paid. The points of information in the four parts of each showing by Industries are brought into a consolidated State recapitulation, in which appear the State totals and averages for each Manufacture and Related Occupation.

Persons Employed, Wages, etc., in Manufactures, . . . 374–594

Agricultural Implements, ... 374–377

Arms and Ammunition, ... 378–380

Artisans' Tools, ... 381–386

Bags and Bagging, ... 387, 388

Book Binderies, ... 389, 390

Boots and Shoes, ... 391–402

Boxes, ... 403–409

Brooms, ... 410–412

Part II. Average Yearly and Total Wages, ... 751, 752
Parts III. and IV. Number of Day and Piece Hands, with Ages, 753, 754

XV. SUMMARY OF THE GENERAL STATISTICS OF MANUFACTURES, BY TOWNS, ... 755–774
Number of Establishments, Number of Steam Engines with Actual Power, Number of Water Wheels with Nominal Power, Whole Number of Persons Employed, Number of Males, of Females, of Males under 15 years of age, of Females under 15, Capital invested, Yearly Wages (estimated), Value of Stock used in Manufactures, and Value of Goods made and Work done, for each Town, City and County, with a County and State recapitulation.

XVI. SUMMARY OF THE GENERAL STATISTICS OF MANUFACTURES, BY INDUSTRIES, ... 775–780
The same points as given in Tabular Presentation XV., classified by Industries.

Page

SPECIAL STATISTICS OF MANUFACTURES AND RELATED OCCUPATIONS, ... 781–828

XVII. MACHINERY FOR COTTON, WOOLLEN AND WORSTED GOODS, . . 783–788

Number of Cotton Spindles, Power Looms and Hand Looms, Number of sets of Woollen Machinery, Power Looms and Hand Looms, Number of sets of Worsted Machinery, Power Looms and Hand Looms, in each Town, City and County making returns of same, with County and State recapitulation.

XVIII. SAWS IN LUMBER MILLS; VATS IN TANNERIES; ENGINES AND MACHINES IN PAPER MILLS; RUNS OF STONE IN GRIST AND FLOURING MILLS, ... 789–798

Number of Saws, Vats, Paper Engines, Paper Machines and Runs of Stone, in each Town, City and County making returns of same, with County and State recapitulations; also, classification of kinds of Saws in Lumber Mills, and a statement of the number of Paper Engines and their Capacity in Pounds, and the kinds of Paper Machines, for each Town, City and County making returns of same, with County and State recapitulation.

XIX. NEWSPAPERS, ... 799–812

Title of each Newspaper, name of Town or City and County where published, how often published, to what object devoted, annual subscription price, year in which established, size of page in inches and number of pages to a copy, with a County and State recapitulation of Number by Periods of Issue, followed by Classifications of Circulation by Periods of Issue, Objects to which Devoted by Periods of Issue, and Date of Establishment.

XX. GAS COMPANIES, ... 813–818

Number of Establishments, Capital Stock, Number of Shares, Price per one thousand cubic feet, Amount received for Gas and all Residual Products, and Amount paid for Coal, Transportation and all other expenses, for each Town and City making returns, with County and State recapitulation.

XXI. SHIP BUILDING, ... 819–822

Number of Vessels Built, Tonnage, Value of Hulls, Value of Vessels with complete Equipment, for each Town and City making returns, with County and State recapitulation; followed by a Classification of kinds of Vessels built.

Page

XXII. Women Furnished with Work at Home, ... 823–828

A presentation showing the number of Women Furnished with Work at Home, distributed by Towns and also by Industries, and giving also the total amount of wages paid them, by Towns and Industries, for the year ending May 1, 1875; followed by a consolidated classification by Industries.

XXIII. Fishing, by Towns and Name, ... 829–838

Giving each Product of Fishing, by name, in a statement for each Town and City making returns, with Quantity obtained, Value, Capital invested, Vessels engaged in, Tonnage and Value of Salt consumed, with a County and State recapitulation; followed by a classification, by name, of each product, with the same specification of details as in the Town and City presentations.

XXIV. Coastwise and Ocean Commerce, ... 839–846

Number of Vessels engaged in, Tonnage, Value, Amount received for Freight, Percentage of Vessels owned (and value of such percentage) by Citizens of Massachusetts, by other American Citizens and by Foreigners, for each Town and City making returns, with County and State recapitulation; followed by a Classification of kinds of Vessels engaged in Commerce, with their distribution by Towns and Cities.

XXV. Appendix, ... 847–912

Table I. Valuation of Personal Property, Valuation of Real Estate, and Total Valuation (from returns of assessors, May 1, 1875), Products of Manufactures and Fisheries, Products of Agriculture and Mining, and Total Products (from Census returns of 1875), by Towns, Cities and Counties, with County and State recapitulation, ... 849–860

Table II. Population, Males, Females and Total, and Persons Employed in Manufacturing and Mechanical Industries, with sex, for 1875, by Towns, Cities and Counties, with County and State recapitulation (from Vol. I. of the Census, "Population and Social Statistics"), ... 861–872

Table III. Occupations by Name for 1875 (also from Vol. I. of the Census), ... 873, 874

Table IV. Occupations by Name, with Ages, for 1875 (this table is also drawn from Vol. I. of the Census), . . . 875, 876

Table V. Manufactures for 1865, giving Number of Establishments, Value of Goods made, Capital invested, Value of Stock used, Males employed and Females employed, by Towns, Cities and Counties, with County and State recapitulation, . 877–888

Page

APPENDIX—Continued

Table VI. Occupations for 1865, giving Number of Establishments, Value of Work done, Capital invested (including value of Vessels), Males employed and Females employed, by Towns, Cities and Counties, with County and State recapitulation, . 889–898

Table VII. Fishing and Commerce for 1865, giving Vessels engaged in, Value of Products, Amount received for Freight, Value of Salt consumed and Tonnage of Vessels, by Towns, Cities and Counties, with County and State recapitulation, . 899–902

Table VIII. Manufactures, Occupations, and Fishing and Commerce, by Name, for 1865, ... 903–912

Manufactures, with Name of each Industry, Number of Establishments, Capital invested, Value of Stock used, Value of Goods made, and Males and Females employed, . . . 903–910

Occupations, with Name of each, Number of Establishments, Capital invested, Value of Stock used, Value of Work done, and Males and Females employed, ... 911

Fishing and Commerce, with Name of each Product, etc., Vessels engaged in, Tonnage, Capital invested, Value of Salt consumed, Value of Products, Amount received for Freight, and Males employed, ... 911, 912

XXVI. TABULAR INDEX: BY TOWNS, ... 913–935

An arrangement of Towns, Cities and Counties in combination with the sub-titles of presentations in this volume, forming a reciprocal index for towns and subjects.

VOLUME II.

MANUFACTURES AND OCCUPATIONS.

INTRODUCTION.

The productive mechanical industries of the State have been classified, for Census purposes, into Manufactures and their Related Occupations. By the former term is meant all those products which require, in their make, labor and raw materials; that is, things produced by hand or machinery from materials called stock. Under this general term have been classed the following:—

Agricultural implements.
Arms and ammunition.
Artisans' tools.
Bags.
Bagging.
Boots and shoes.
Boxes.
Brooms.
Building.
Carriages and wagons.
Carpetings.
Chemical preparations.
Clocks and watches.
Clothing.
Cotton goods.
Dress trimmings.
Drugs and medicines.
Dyestuffs.
Fertilizers.
Fine arts.
Food preparations.
Furniture.
Glass.
Leather.
Linen.
Liquors and beverages.
Lumber.
Machines and machinery.
Metals and metallic goods.
Musical instruments and materials.
Oils and illuminating fluids.
Paper.
Printing.
Print works.
Polishes and dressings.
Publishing.
Railroad construction.
Rubber.
Scientific instruments and appliances.
Silk.
Stone.
Tobacco.
Vessels.
Wooden goods.
Woollen goods.
Worsted goods.
Miscellaneous manufactures.

The various subdivisions under these general heads, will be found on pages 189–225.

By Related Occupations is meant those industries where an added value is given an article by new processes or manipulations with the use of little, if any, additional stock. Under the term Related Occupations, we have classed—

Blacksmithing.
Bleaching and dyeing.
Bottling.
Bronzing.
Building moving.
Butchering.
Cane seating chairs.
Carpentry and joinery.
Carpet making.
Carpet, feather and hair cleansing.
China decorating.
Clock repairing.
Clothing repairing and remodelling.
Clothes making, etc.
Cloth finishing.
Coastwise and ocean commerce.
Cobbling.
Coopering.
Coppersmithing.
Cotton waste cleaning.
Cotton drying.
Curing fish.
Decorating.
Drain building.
Draughting and designing.
Electro-plating.
Embroidery stamping.
Enamelling.
Engraving.
Fishing.
Fresco painting.
Gilding.
Glass cutting and graving.
Glazing.
Gunsmithing.
Harness and saddle repairing.
Japanning.
Jewelry repairing.
Lapidary work.
Lathing.
Locksmithing and bell-hanging.
Machinists' work.
Masoning.
Metal plating.
Paper and wood hanging.
Paper ruling.
Painting.
Paving.
Plastering.
Plumbing.
Roofing.
Sewing-machine repairing.
Silversmithing.
Stair building.
Steam and gas fitting.
Stone cutting and dressing.
Tack leathering.
Telegraph building.
Tinsmithing.
Umbrella repairing.
Upholstering.
Varnishing and polishing.
Vessel repairing.
Watch repairing.
Wheelwrighting.
Whitening and coloring.
Wool stapling.
Wool washing and drying.

The detailed classification of occupations by name will be found on pages 226–228, but the above general list indicates fully the distinguishing features of it. The value of manufactures is the cost of the labor and stock which enter into their production; while in occupations the value is simply the work done; by each the production of the State is increased. In the various presentations in this volume the value under "Manufactures" is stated as "goods made," and under "Occupations" as "work done." Generally in censuses no such distinction has been made, all being brought under the broad term manufactures. This

distinction became essential in this census in order to facilitate the gathering of the information sought, otherwise it would be somewhat arbitrary and unmeaning. The general introduction to the census volumes, contained in Volume I., described the distinctive features of this census, and the methods employed; the description need not be repeated here.

The manufactures and occupation schedules, furnished the manufacturers and employers, contained all the inquiries relative to the production of mechanical industries for the year ending May 1, 1875, and the answers to them as given by the manufacturers and employers form the basis of the tabulations presented in this volume. Less than a score of the persons in the State, bound by law to make returns, have failed to do so, and in nearly all these cases a sufficient reason existed for non-compliance. Having, then, a separate report from each and every manufacturing establishment in the Commonwealth, certified to by the proprietors, or for them by the enumerator, it will readily be seen that the fullest confidence can be placed in the facts given. Whenever confidence should not be given we shall unhesitatingly state the exact parts lacking proper completeness and give the reasons therefor. Every effort has been made to secure the fullest returns, the aim to make the total value of products perfectly accurate being uppermost at all times; great credit is due the manufacturers for the general intelligence with which they have aided the exertions of the officers of the bureau. If, however, it is found that the product of this or that community, as stated in this volume, falls short of the actual facts, the reader must let his criticism fall where it justly belongs, upon the parties giving information, and not upon this office, or upon the census enumerator.

When manifest error has been made, the system adopted, as explained in general introduction to Volume I., has allowed every facility for correction, and these facilities have been used to the fullest extent.

This volume is preëminently a report on the statistics of labor, for it presents, either in its tables, or by the computations and various manipulations which may be made, the most important features of the labor of the State. The space devoted to wages, although extended, is well occupied, and we warmly commend its exhibits to the careful consideration of both employer and employed.

The state of the mechanical industries of the Commonwealth at the time of writing does not differ materially from that at the time of the enumeration, the summer of 1875. We believe the aggregate pro-

duction of such industries, as given in this volume, falls short of the actual production less than 5 per cent. In the light of the hard and unanswerable arguments of facts as evidenced herein, our anxiety for the future, industrially, of Massachusetts must be allayed. Our great industries are built upon too firm a foundation to be toppled over by any ephemeral, speculative schemes, and they will only wane to that extent which is necessary to the proper adjustment of the great branches of human enterprise, agriculture, commerce and manufactures. In this adjustment, the equilibrium of which is now disturbed by the vast sectional resources which stagnate home markets, New England is sure to hold her proper position, and exert her proper influence. Encouragement and confidence, with some of that enterprise which sends our goods into the face of foreign production, will enable the manufacturers of Massachusetts to still further enrich the State by their successes. One of Napoleon's maxims, that "statistics mean the keeping of an exact account of a nation's affairs, and without such account there is no safety," finds practical application in this, that the men who by their enterprise have kept our factories and workshops open in such large degree during the present depression, can know by this account of stock that the results warrant their efforts, and compare most favorably with other years; and although profits have been meagre, the amount of goods made and work done has kept thousands employed, and consequently a direct service to the public good has been accomplished. The same energy, courage and ability will replace with new industries those we may lose in the inevitable adjustment now apparently taking place.

Many important points can not be brought out in the tables; we therefore obey the promptings of experience and incorporate a brief analysis of the tabular work of this volume.

The first presentation (pages 1–185), MANUFACTURES AND OCCUPATIONS, BY TOWNS, exhibits the special productions of each town in the State, arranged by counties; the number of establishments and capital invested are also given. Each article produced, and each occupation followed, is given in detail by name. The town unit is preserved, and the showings picture the condition, so far as products are concerned, in a manufacturing sense, of each city and town in the State. As has been intimated, if the aggregate as given for any one town does not fully realize the ambition of its citizens, they must complain to their manufacturers and employers, and not to us; this will occur but rarely; on

the other hand most people are surprised at the magnitude of their own work. Without an account they rarely comprehend the aggregate amount, the details of which may be familiar to them. The towns of Mashpee, in Barnstable County, Mount Washington and Washington in Berkshire County, Berkley in Bristol County, Gay Head and Gosnold in Dukes County, Boxborough in Middlesex County, and Hull in Plymouth County, do not appear in this presentation. Their products are either from agriculture, shown in Volume III., or from fishing, shown in this volume, under the proper title. A few apparent incongruities appear in this presentation, as for instance the capital invested in the manufacture of boots and shoes in Wayland is $52,500, while the product is $1,889,175. This occurs from the fact that the making of boots and shoes in Wayland is by contract. As a rule, wherever such discrepancies appear, a sufficient reason exists for the seeming error. The totals, by towns, are recapitulated on pages 179–184 ; while on page 185 is a recapitulation by counties. By this recapitulation it is seen that the total products of the mechanical industries of the State are $592,331,962, from 22,228 establishments, on a capital invested of $282,683,718. Of the number of establishments given, 10,915 come within our classification of manufactures purely, and 11,313 under that of occupations. No limit of amount of business done has been placed upon establishments as necessary to their being considered. Many of those industries we have classed as occupations have in former censuses, both state and national, been called manufactures; it is therefore proper to compare the whole number of establishments in both classes of this census with the whole number returned as manufactures under former censuses. With this understanding we have made no limit, as above stated, to the amount of annual production necessary for a concern to be considered as an establishment, as was done in the last national census. In 1865 the total number of establishments was 11,823, a gain in 1875 of 10,405. This large gain is, to a great degree, real, and is partly accounted for by an extension of the enumeration to manufactures not included in the census of 1865. Any one not agreeing with our classification can adjust it to suit his own ideas, as it is preserved complete in all showings where it enters into the composition of the tables. The capital invested in 1865 was $174,361,496 ; a gain in 1875 of $108,322,222. The total product of mechanical industries in 1865 was $429,906,046 ; a gain, in 1875, of $162,425,916. But these figures are in currency,

gold in 1865 being at 1.57, and in 1875 at 1.12. Reduced to a gold basis in both years the products of manufactures in 1865 were $273,825,507; in 1875, $528,867,823; gain, $255,042,316; or 93+ per cent on a gold basis. Of the whole number of establishments, 22,228, less than 700, incorporated mostly, control about $165,000,000 of the whole capital ($282,683,718) invested in mechanical industries, leaving about 21,500 establishments with a capital of $118,000,000.

The following table exhibits the towns in which the increase over 1865 has been most marked:—

Cities and Towns.	Counties.	Currency Value of Manufactures, 1865.	Currency Value of Manufactures, 1875.	Increase.
Falmouth,	Barnstable,	$208,800	$492,230	$283,430

Totals,		$268,117,760	$441,469,304	$173,351,544

In the 73 cities and towns named above, the products of manufactures in 1865 amounted to $268,117,760 (gold, $170,775,643); in 1875 to $441,469,304 (gold, $394,169,021); an increase over 1865 of $173,351,544, or a gold increase of $223,393,378, or 130+ per cent. These 73 cities and towns produced 75— per cent of the whole product of manufactures for the State. The cities of Taunton, New Bedford and Lawrence do not find a place in the above table, although the latter city made a large increase in her productions; it is made to appear otherwise by reason of the various duplications reported in 1865, carrying the total of her products for that year far above the actual facts.

In the products of mechanical industries, 1875, Suffolk County stands first, returning $140,809,856 worth; Middlesex second, with an aggregate of $103,085,248; Essex third, $93,482,744; Worcester fourth, $81,743,707; Bristol fifth, $51,099,087; Hampden sixth, $35,692,030; Norfolk seventh, $26,905,040; Berkshire eighth, $21,015,328; Plymouth ninth, $20,590,132; Hampshire tenth, $10,797,556; Franklin eleventh, $5,301,874; Barnstable twelfth, $1,531,812; Nantucket thirteenth, $173,983; Dukes fourteenth, $103,565.

It should be remembered that throughout this introduction all values for all years are given in currency, unless specially designated to be in gold.

Manufactures and Occupations, by Name (pages 187–229) is a presentation of number of establishments, capital invested and value of goods made, by the name of the industry, while for twenty-four leading industries the towns where the goods are made are given under the proper heading; as, for instance, under the caption Boots and Shoes, each town in the State where boots and shoes are made is given, with establishments, capital and goods made. The twenty-four industries presented in this way, are the manufacture of—

Arms and ammunition.	Furniture.	Oils and illuminating fluids.
Agricultural implements.	Leather.	Paper.
Artisans' tools.	Liquors and beverages.	Printing and publishing.
Boots and shoes.	Lumber.	Stone.
Boxes.	Machines and machinery.	Tobacco goods.
Carriages and wagons.	Metals and metallic goods.	Wooden ware.
Clothing.	Musical instruments and materials.	Woollen goods.
Cotton goods.		Worsted goods.
Food preparations.		

The value of the products of these branches of our industries is $448,313,933, out of a total of all kinds of goods made of $532,136,333, and they represent 8,678 establishments out of a total of 10,915.

The specific articles made under each of the above general heads, are given under each caption, while other important and miscellaneous manufactures follow in detail by name. The whole represents a list of 1,136 different articles returned and classified.

From this presentation it is seen that the manufacture of textiles and leather and leather goods comprises nearly one-half the total value of all goods made in the State. The textiles are as follows :—

Bags and bagging,	$670,595
Carpetings,	6,190,239
Cotton goods,	77,934,753
Cotton and woollen and other textiles,	8,107,999
Linen goods,	790,609
Woollen goods,	39,566,378
Worsted goods,	2,991,210
Total,	$136,251,783

Leather, and boots and shoes, as follows :—

Leather,	$23,680,775
Boots and shoes,	89,375,792
Total,	$113,056,567
Aggregate of these two grand industries,	$249,308,350

The following tables show those towns in which, in 1865, boots and shoes, leather, cotton goods and woollen goods were produced, and the value of their productions for that year. To make comparisons with 1875, the reader must consult the presentation by towns for 1875.

Those industries which produced $1,000,000 worth, or over, of goods or work, in 1875, are the following :—

Arms and ammunition,	$1,502,841
Agricultural implements,	2,365,004
Artisans' tools,	2,459,275
Blacksmithing (including horseshoeing),	3,274,816
Boots and shoes,	89,375,792
Boot and shoe making (cobbling and contract-work),	3,449,441
Boxes,	2,624,901
Brushes and brooms,	1,023,925
Bricks,	1,655,250
Butchering,	14,379,934
Building,	8,656,471

Carpentry and joinery,	$8,012,265
Carpetings,	6,190,239
Carriages and wagons,	4,433,458
Clocks and watches,	1,331,824
Clothing,	29,340,962
Cordage, lines, etc.,	2,124,332
Cotton goods,	77,934,753
Cotton and woollen and other textiles,	8,107,999
Drugs and medicines,	2,987,305
Elastic goods,	1,932,486
Fish curing and packing,	3,811,814
Fishing,	7,684,716
Freighting, ocean and coastwise,	3,164,845
Food preparations,	44,633,984
Furniture,	8,422,883
Gas and residual products,	4,350,841
Glass,	1,484,500
House and sign painting,	2,850,221
Leather,	23,680,775
Liquors and beverages,	8,967,140
Lumber,	3,953,956
Machines and machinery,	16,399,230
Machinists' work,	2,134,717
Masoning and plastering,	2,203,579
Metals and metallic goods,	37,884,873
Musical instruments and materials,	5,504,030
Oils and illuminating fluids,	5,838,889
Paints, colors and chemicals,	2,239,408
Paper,	15,602,599
Plumbing, gas fitting and roofing,	1,631,509
Printing and publishing,	12,120,674
Print works,	3,609,669
Railroad construction,	1,720,510
Rubber goods,	3,383,796
Silk goods,	1,842,200
Soap, candles, tallow, etc.,	3,315,434
Steam and gas fitting,	1,130,837
Stone,	2,902,190
Stone cutting and dressing,	1,703,954
Straw and palm-leaf goods,	5,922,345
Tin and coppersmithing, etc.,	1,882,580
Tobacco goods,	2,599,819
Vessels,	3,840,119
Wooden goods,	7,208,317
Woollen goods,	39,566,378
Worsted goods,	2,991,210

In order that the facts relating to the chief industries of the State for the year ending May 1, 1875, may be compared with those for former years, we have arranged the following table, showing comparison for 1845, 1855, 1865 and 1875 :—

Principal Manufactures for 1845, 1855, 1865 and 1875.

MANUFACTURES.	1845.	1855.	1865.	1875.
Agricultural Implements.				
Number of establishments,	132	55	40	38
Capital invested, . .	$252,115	$657,375	$1,063,040	$1,144,475
Value of stock used, . .	–	–	$1,460,510	$365,586
Persons employed, . .	588	1,260	1,109	1,187
Value of goods made, .	$510,838	$1,779,027	$2,648,810	$2,365,004
Arms and Ammunition.				
Number of establishments,	32	33	36	20
Capital invested, . .	$1,029,848	$236,500	$1,596,250	$964,300
Value of stock used, . .	–	–	$1,637,229	$421,047
Persons employed, . .	454	376	2,307	1,109
Value of goods made, .	$508,319	$673,751	$4,898,094	$1,502,841
Artisans' Tools.				
Number of establishments,	35	26	55	124
Capital invested, . .	$48,225	$409,860	$1,889,250	$2,226,570
Value of stock used, . .	–	–	$1,561,205	$831,980
Persons employed, . .	340	1,532	2,162	1,240
Value of goods made, .	$256,340	$1,769,268	$3,474,240	$2,459,275
Bags and Bagging.				
Number of establishments,	–	–	5	6
Capital invested, . .	–	–	$108,000	$437,000
Value of stock used, . .	–	–	$342,500	$528,282
Persons employed, . .	–	–	192	226
Value of goods made, .	–	–	$419,500	$670,595
Boots and Shoes.				
Number of establishments,	–	–	206	1,461
Capital invested, . .	–	–	$10,322,599	$18,692,864
Value of stock used, . .	–	–	$36,418,845	$54,976,504
Persons employed, . .	45,877	77,827	52,821	48,090
Value of goods made, .	$14,799,140	$37,501,725	$56,113,987	$89,375,792
Pairs of boots and shoes made, ...	20,896,312	45,066,828	31,870,581	59,762,866
Boxes.				
Number of establishments,	–	199	221	157
Capital invested, . .	–	$439,125	$512,612	$1,147,250
Value of stock used, . .	–	–	$798,860	$1,351,241
Persons employed, . .	235	792	1,191	1,528
Value of goods made, .	$215,105	$997,783	$1,393,718	$2,624,901
Bricks.				
Number of establishments,	–	–	101	104
Capital invested, . .	–	–	$566,815	$1,657,625
Value of stock used, . .	–	–	–	$468,176
Persons employed, . .	1,407	1,109	1,079	2,394
Value of goods made, .	$612,832	$2,267,165	$772,442	$1,655,250
Quantity made, in M, .	110,076	108,353	88,495	215,152

PRINCIPAL MANUFACTURES, ETC.—Continued.

MANUFACTURES.	1845.	1855.	1865.	1875.
BRUSHES AND BROOMS.				
Number of establishments,	19	18	10	57
Capital invested,	$68,875	$267,600	$281,200	$395,650
Value of stock used,	–	–	$310,117	$526,670
Persons employed,	533	689	535	669
Value of goods made,	$354,714	$807,635	$593,577	$1,023,925
BUILDING.				
Number of establishments,	–	–	788	379
Capital invested,	–	–	–	$1,484,045
Value of stock used,	–	–	$4,121,411	$3,451,545
Persons employed,	–	–	4,742	4,033
Value of goods made,	–	–	$6,708,608	$8,656,471
BUTTONS.				
Number of establishments,	2	7	10	10
Capital invested,	$51,500	$172,500	$226,800	$409,000
Value of stock used,	–	–	$293,300	$213,355
Persons employed,	60	229	419	771
Value of goods made,	$56,080	$267,120	$608,617	$559,058
CARPETINGS.				
Number of establishments,	17	13	13	24
Capital invested,	$488,000	$2,264,172	$2,370,200	$3,855,950
Value of stock used,	–	–	$3,153,609	$3,236,606
Persons employed,	1,034	1,614	1,734	3,119
Value of goods made,	$834,322	$1,362,819	$4,207,509	$6,190,239
Yards of carpeting made,	1,158,958	1,988,460	2,124,915	8,507,235
CARRIAGES AND WAGONS.				
Number of establishments,	563	425	285	356
Capital invested,	$553,434	$949,770	$1,106,938	$2,412,709
Value of stock used,	–	–	$1,248,673	$2,099,173
Persons employed,	1,881	2,491	1,941	3,072
Value of goods made,	$1,343,576	$2,352,955	$2,427,777	$4,433,458
CLOCKS (and Watches in '75).				
Number of establishments,	9	2	2	14
Capital invested,	$10,350	$17,000	$43,000	$1,853,950
Value of stock used,	–	–	$6,500	$523,643
Persons employed,	40	26	42	1,140
Value of goods made,	$54,975	–	$35,764	$1,331,824
CLOTHING.				
Number of establishments,	160	93	809	1,088
Capital invested,	$213,793	$3,120,973	$6,806,596	$9,184,826
Value of stock used,	–	–	$18,252,309	$17,412,942
Persons employed,	1,003	1,758	29,914	13,702
Value of goods made,	$797,434	$9,061,896	$24,235,862	$29,340,962
CORDAGE, LINES, ETC.				
Number of establishments,	49	44	31	16
Capital invested,	$543,930	$636,400	$850,175	$537,000
Value of stock used,	–	–	$1,985,186	$1,498,705
Persons employed,	647	1,000	822	992
Value of goods made,	$906,321	–	$2,768,902	$2,124,332
Pounds manufactured,	9,398,783	20,653,418	13,865,600	25,658,000

PRINCIPAL MANUFACTURES, ETC.—Continued.

MANUFACTURES.	1845.	1855.	1865.	1875.
COTTON GOODS.				
Number of establishments,	302	294	237	220
Number of spindles,	817,483	1,519,527	1,913,756	3,859,237
Capital invested,	$17,739,000	$31,961,000	$33,822,086	$63,844,708
Value of stock used,	–	–	$50,393,831	$41,059,893
Persons employed,	20,710	34,787	24,151	60,176
Value of goods made,	$12,193,449	$26,140,537	$55,508,447	$77,934,753
Yards of cloth manufact'd,	178,401,614	318,224,188	175,875,934	874,780,874
COTTON AND WOOLLEN AND OTHER TEXTILES.				
Number of establishments,	–	–	–	28
Capital invested,	–	–	–	$4,751,597
Value of stock used,	–	–	–	$4,260,185
Persons employed,	–	–	–	3,290
Value of goods made,	–	–	–	$8,107,999
DRUGS, MEDICINES AND DYE-STUFFS.				
Number of establishments,	–	–	89	118
Capital invested,	–	–	$474,667	$1,124,226

The foregoing table embraces all important industries for which the elements of comparison in one or more particulars existed for two or more of the years named. Many more points for 1875 could have been stated, but no corresponding facts had been returned for the other years. In this matter we miss comparisons as to wages, values of buildings, steam and water power, etc. All values stated in the table are currency, gold being at par in 1845 and 1855, at 1.57 in 1865, and 1.12 in 1875; to reduce the values in 1865 to par, divide by 1.57, and 1875 by 1.12. We then have a just money value of comparison. This basis is, however, fictitious in a large degree; hence the importance of the table above, wherein other elements, quantities, hands employed, etc., are exhibited. With these matters understood, the table becomes of great utility, and the labor and research essential to its production are amply repaid. Attention should be called to some of its features.

In Arms and Ammunition for 1845 and 1865, it is evident the items for the United States Armory have been included.

Glancing at Boots and Shoes, the effect of machinery becomes clearly apparent. In 1845, the number of hands employed, 45,877,

produced 20,896,312 pairs of boots and shoes; in 1855, 77,827 persons made 45,066,828 pairs; in 1865, 52,821 persons produced 31,870,581 pairs, while 48,090 persons in 1875 made 59,762,866 pairs, or nearly three times as many as were made in 1845 by only 3,000 less persons. The number employed in 1875, however, as shown by the table above, should be increased by 1,518 women, furnished with work at home (see p. 828), making a total employed in boots and shoes of 49,608. This does not change the features stated.

To the value of Brushes and Brooms for 1875, there should be added $400,000 worth manufactured by an establishment whose returns were inadvertently omitted in the body of the tables under Manufactures by Name.

To the number employed in the manufacture of Clothing for 1875, should be added 9,249 women working at home.

In the manufacture of Cotton Goods in 1875, 60,176 operatives produced 874,780,874 yards of goods, while in 1845, about one-third (20,710) the number of operatives produced but one-fifth (178,401,614) the number of yards. We have shown Cotton and Woollen Goods (mixed) for 1875, but not for the other years, because for those years they were classed either with cotton or woollen goods.

The statements for Print Works demand attention. In all the censuses prior to 1875, the products of print works have in a majority of instances been identical in yards and value, with the products of the mills weaving print cloths. This, of course, is erroneous, as the printing is only a part of the manufacture of the completed prints, and should only appear as such, as in the statement for 1875. This explanation will account for the apparently glaring discrepancies in the foregoing table under Print Works. It has been impossible to eliminate the duplications in 1845, 1855 and 1865. This error of duplication in the products of cotton factories often occurs in censuses, and of course to the extent of its occurrence deceives the public, and exaggerates the production of a State. This has occurred in a recent census in a neighboring State, where the products of her print works have been reported at over sixteen million dollars, and the whole product of her cotton mills but about twenty-two million, while the stock used in her print works was over thirteen millions, and in her cotton mills only twelve millions. The true product of her print works should have been reported at about $3,000,000.

The value of work done in print works, for 1875, amounted to $3,609,669 on 251,405,321 yards of goods, while in 1865 the value

of products was given at $23,935,271 on 89,463,013 yards, while the whole products of our cotton mills in that year were valued at $55,508,447. The figures for 1875 relate to work done in establishments carried on exclusively as "print works," and not to those cotton factories having their own print works connected therewith.

By Railroad Construction, is meant cars, springs, wheels, etc.

To the number of persons employed on Straw and Palm-leaf Goods, should be added 14,762 women furnished with work at their homes; the number in the table includes those only who work in the factory.

The magnitude of all our textile manufactures is well displayed under Textiles (all kinds), where it is seen that the product has grown from 195,759,729 yards in 1845, to 992,506,132 yards, the product of our mills for 1875, a bandage long enough to be wound around the globe nearly twenty-three times.

In Woollen Goods again, is the influence of machinery clearly shown, 19,036 persons producing 90,208,280 yards of goods in 1875, while it took 18,753 persons in 1865 to produce 46,008,141 yards.

Articles Made, by Name (pages 233–249), is a short presentation, giving the quantity, value, and, whenever possible, the average value for the unit of measurement, for each article manufactured, by its specific designation. In the previous presentation the specific names have been given under a general head; for instance, under Agricultural Implements (page 189) were included apple parers, garden rakes, harrows, scythes, etc., while in this presentation these articles are specifically mentioned with quantity and value.

Stock Used, by Towns (pages 253–255), exhibits the value of raw material of all kinds used in the manufacture of goods of all kinds. Out of 10,915 establishments, but 252 failed to return the stock used. Following this (pages 259–261) is shown the Stock Used, by Industries, in which is given the value of raw material entering into the manufactures of the State. No returns were called for of stock used in what have been termed Occupations. By reference to page 255 it will be seen that the total value of stock used was, for 1875, $294,963,575, as against $264,958,060 for 1865.

Under Selected Stock, by Towns (pages 265–282), is shown the consumption of the principal articles of stock in the principal cities and towns. The total value of the leading articles of stock, as given by towns, is $166,981,069, or 56+ per cent of the whole amount of stock used.

Stock Used, by Name (pages 285–308), exhibits the names, quantities and values of all kinds of stock used in the State for each separate article of stock used in the manufacture of all kinds of goods. This showing is valuable in most respects; a completely minute classification, of course, is almost impossible. Most manufacturers can, quite readily, give the total value of all stock used, and the leading articles by name, but so many elements enter into the manufacture of various kinds of goods, it is impossible for all to state the quantities and values. This and the preceding presentations on stock, however, display the chiefly valuable features connected with the subject. Some items reported by a few appear trivial, but it is because of the inability of all proprietors to clearly state the exact proportion of miscellaneous stock used. Comparisons with former years, so far as the staple products are concerned, can readily be made by reference to the table on page xxix, and need not be repeated here. The number of cows supplying milk to cheese factories exclusively was 5,486.

Values of Buildings, Stock on Hand, and of all Machinery (pages 311–316), teaches some important facts. The total value of buildings occupied by manufacturers is $80,997,503. The whole number of establishments in the State, 10,915, of course, would not return this point, because many occupy buildings returned by others, owners and proprietors; but whenever this occurred, the fact was stated; thus it will be seen that these figures are trustworthy. The value of average stock on hand reaches the sum of $89,061,506, and of machinery used, $73,434,914, of which only $5,120,488 worth was imported during the decade, 1865–1875, while the value of machinery made in Massachusetts for the same period was at least $80,000,000, it being $16,399,230 for 1875. This certainly does not show very great dependence upon foreign production so far as machinery is concerned.

The total amount invested in buildings, stock on hand and machinery is $243,493,923, which represents so much of the capital invested in manufactures ($267,074,802 not including occupations), and is an excellent proof of the correctness of the latter sum, for if details are correct results must be also.

The facts, as shown in this presentation, were brought out by questions suggested by the Honorable Commissioner of Insurance, and the original returns upon these points will be classified by him in his official reports, but upon an insurance basis, and therefore can not

be compared with our showing, because we simply deal with the items of value in the aggregate.

The value of buildings occupied for manufactures, together with the value of machinery and of average stock on hand, classified by industries, are shown in the following table :—

INDUSTRIES.	Value of Buildings.	Value of Machinery.	Value of Average Stock on hand.
Agricultural implements,	$227,845	$171,950	$340,625
Arms and ammunition,	195,350	425,900	203,500
Artisans' tools,	512,150	401,430	701,665
Bags and bagging,	202,000	251,000	32,500
Boots and shoes,	4,330,332	2,588,305	9,031,734
Boxes,	479,250	341,796	346,303
Brushes and brooms,	91,350	27,910	290,285
Building,	327,175	172,790	312,195
Carriages and wagons,	1,150,665	218,913	1,276,584
Carpetings,	923,900	836,275	1,004,175
Chemical preparations,	3,250	1,574	2,050
Clocks and watches,	242,800	418,820	955,066
Clothing,	4,399,060	870,126	6,465,157
Cotton goods,	10,162,506	13,703,549	6,437,792
Cotton and woollen and other textiles,	1,155,000	1,961,500	3,154,233
Dress trimmings,	13,000	29,169	16,300
Drugs and medicines,	508,360	129,273	334,495
Dyestuffs,	89,000	76,200	100,000
Fertilizers,	296,500	184,850	370,500
Fine arts,	23,300	3,540	10,625
Food preparations,	3,291,850	1,493,334	2,366,474
Furniture,	1,809,540	854,565	2,430,532
Glass,	180,600	188,605	393,570
Leather,	2,138,702	1,218,838	5,302,486
Linen,	361,600	182,000	127,586
Liquors and beverages,	1,342,477	466,582	734,761
Lumber,	999,945	1,029,937	1,293,750
Machines and machinery,	2,600,943	2,633,033	2,613,836
Metals and metallic goods,	7,921,648	6,602,583	9,098,027
Musical instruments and materials,	992,800	167,780	1,027,933
Oils and illuminating fluids,	483,000	426,113	1,089,410
Paper,	3,096,741	2,985,104	2,434,746
Polishes and dressings,	46,800	20,850	111,137
Printing and publishing,	1,880,140	1,001,254	868,216
Print works,	11,815,758	14,428,345	7,461,679
Railroad construction,	174,400	163,200	320,400
Rubber,	401,180	412,050	712,000
Scientific instruments and appliances,	73,292	66,450	129,700
Silk,	22,000	89,600	105,900
Stone,	445,565	222,574	614,991
Tobacco,	431,405	13,099	563,758
Vessels,	175,950	44,165	320,561
Wooden goods,	1,541,195	929,491	1,767,136
Woollen goods,	5,167,218	5,795,953	7,439,882
Worsted goods,	167,500	237,500	224,400
Miscellaneous,	8,102,461	8,947,039	8,122,851

MOTIVE POWER, BY TOWNS (pages 319–325). The recapitulation, on page 324, shows 2,525 steam engines, 2,950 water wheels, 254 horse powers, 1,031 hand powers, 2,749 foot powers, and 38 windmills in use in the State for driving its machinery, while on page 325 is a classification of the kinds of steam engines and of water wheels employed. Of the whole number of steam engines, 2,257 are high pressure, and of the water wheels 209 are breast, 124 overshot, 62 undershot, and the great majority, 2,317, are turbine. Under this head the kinds of power are given for each city and town. Following this presentation is—

STEAM AND WATER POWER, BY TOWNS (pages 329–334), which exhibits the nominal and actual horse power of the steam engines and water wheels in each city and town. We failed to obtain the actual horse power of 14 steam engines and the nominal power of 221 water wheels, out of the whole number, 2,525 engines and 2,950 water wheels. These omissions are not of sufficient magnitude to impair the value of the figures given. By nominal horse power is meant that estimated power put upon an engine by the seller; this is always far within the actual capacity, for reasons of safety and on account of the deduction usually made for power to drive the belting, shafting, etc.; so that the nominal horse power has more particular reference to the power delivered to the machine, while actual horse power, which we have obtained by proper measurement, and computation in this office, relates to the actual initial capacity of an engine. As to water wheels, we could obtain only the nominal power, for to secure the actual would require a scientific survey of all the elements of each water power, the head, the fall, etc. The nominal horse power of the steam engines of the State is 109,307, the actual, 208,186, and the nominal power of the water wheels, 110,582. Following this presentation is a brief showing of—

STEAM AND WATER POWER, BY INDUSTRIES (pages 337, 338). Under this title, power is classified according to the industries in which it is used. The total horse power, of steam engines and water wheels, employed in the industries of the State, is 318,768, equal to the hand labor of 1,912,488 men; this labor is actually performed, with the aid of the motive power of the State, by about 300,000 men, women and children. In other words, the industries of Massachusetts, without the aid of her motive power, would require a population of about 7,400,000, or nearly $4\frac{1}{2}$ times as great as it is now, to furnish the

hand labor necessary to carry them on. The use of motive power is to this extent supplemented to hand labor, but the influence of this supplemental labor has not been alike in all industries. In horology, 29 horse power, or the physical force of 174 men, representing on the scale we have chosen a population of 522, supplements by the aid of accurately thought-out machinery the work of 1,140 souls, representing a population of 5,700, and by the aid of this very machinery in which human thought is so formularized in metal as to go on forever with the cheapest power doing the work of very competent men, represents a far greater increase in the production of clocks and watches than the average ratio of $4\frac{1}{2}$ to 1, while the 20,386 horse power of the paper workers which supplements the labors of 6,792 souls in the business probably represents a less productive ratio. In the one case, the watchmaker represents the physical force of 1.15 men. In the other, the paper worker represents the physical force of more than 18 men. In textile fabrics, with 70,715 work people, we have 105,492 horse power employed, representing in each operative the physical force of nearly 9. The hard work of the leather business is done for 6,774 persons by 9,576 horse power, while the 1,565 box makers consume 4,542 horse power. The 48,536 boot and shoe workers, with their infinite subdivisions and wonderful use of highly organized machinery, only employ 8,817 horse power, or about a man power each beyond his own force, while the furniture artisan employs 1.1 horse power, and the lumber workers, 2,095 in number, employ 16,865 horse power, giving each a physical equivalency of about 50 men. In the manufacture of food preparations, only 4,760 persons are employed in the State, much of our food being imported, yet they consume 10,010 horse power, having a productive equivalency of more than 12.7 to 1. The makers of carpetings employ a horse power to an operative.

These comparisons could be multiplied, but enough have been given to illustrate the magnitude of the influence of motive power on the industries of the State.

Persons Employed in Manufactures and Occupations, with Classification by Sex, Age, etc. (pages 341–359), is a presentation giving the whole number of persons, by sex and age, in the various towns, actually engaged in the mechanical industries of the State during the year ending May 1, 1875, as returned on the certificates of the manufacturers and proprietors themselves, and these

returns comprehended all employed in the manufacture of goods or in occupations, in accordance with the classification stated at the beginning of this introduction. This table furnishes the best proof of the completeness and accuracy of the Census of 1875, in this, that by the returns of the people themselves, upon the family schedule, as shown on page 873, in a table reproduced from Volume I., the whole number, of all ages and of both sexes, having an occupation in some manufacturing or mechanical industry was 316,459; of which 233,252 were males, and 83,207 were females; and of the males 228,469 were above fifteen years of age, 4,725 from ten to fifteen, and 58 below ten; of the females 77,238 were above fifteen, 5,863 from ten to fifteen, and 106 below ten. This total, 316,459, included all actually engaged in mechanical pursuits, and also those who claimed a mechanical pursuit as an occupation, whether actually engaged during the year or not. Now, from the returns of the manufacturers and proprietors, on certificates entirely distinct from the family returns, we have, as will be seen by reference to page 359, a total of 308,963 of both sexes and all ages actually employed in manufacturing and mechanical pursuits. Of this number 214,308 were males, 207,553 being over fifteen, 6,671 between ten and fifteen, and 84 under ten years of age. The females numbered 94,655, of which 89,499 were over fifteen, 4,988 between ten and fifteen, and 168 under ten years of age. The variation in totals, as shown between the family returns, presented in Volume I., and those from manufacturers and proprietors, is but 7,496, a very small number indeed. The variation in the number of females over fifteen, as given by the two processes, is the result of erroneous answers to the family schedule inquiries as to occupations. The figures, drawn from the returns which form the basis of this volume, must be taken as correct, for the classification has been arbitrary and absolute, on the answers of the proprietors, of the number of males and females employed, and no liability to error existed, as in the case of the answers by operatives. The apparent discrepancy in the number of males occurs by not counting, in this volume, the proprietors themselves, while in Volume I., on the basis of the family returns as to occupation, they were classed as engaged in a manufacturing or mechanical industry. The variations, however, on the whole, are so insignificant, and the reasons, to us, so satisfactory, that we consider the comparison the best test of the completeness of the Census, and of the conscientious co-operation of the people. In addition to the 308,963, as shown in

this volume as being employed in mechanical pursuits, 32,702 women were furnished with work at home, being also engaged in housework. By this presentation (page 359), we also learn that 895 children, of both sexes, were employed for more than nine months in the year, in direct violation of the provisions of law; by the family returns (Volume I.) there were returns of 8,616 such violations.

Persons Employed and Wages, by Towns (pages 363–369), exhibits for each city and town a statement of persons employed, classified as to age and sex, with their wages, as returned by proprietors in manufactures and occupations, for 266,339 employés. The whole number of persons employed, as returned, was, as stated under the previous topic, 308,963, but wages were given for 266,339 of that number, as shown in this presentation. The total amount of wages paid this latter number was $126,711,583, of which males above fifteen years of age received $101,913,544, and females above fifteen, $23,248,404; both sexes under fifteen, $1,549,635. The average yearly wages of both sexes was $475.76; of males above fifteen, $568.13; of females above fifteen, $343.42; and of both sexes under fifteen, $146.65. These averages, it should be remembered, are for all industries; for each industry they are given in the next presentation, entitled, Persons Employed in Manufactures and Occupations, by Industries (pages 374–754); with Classification by Sex, Age, etc.; Running Time in Manufactories; Daily and Yearly Working Time; and Daily, Yearly and Total Wages for Day and Piece Hands. This grand presentation of the subject of wages is for the 266,339 persons, as stated above. The variation in numbers—that is, between the whole number employed, 308,963, and the number for whom wages were returned, 266,339—is accounted for generally by inability to divide time, in many callings, and give the proper classification of wage payments; this reason prevailed in most cases, for the proprietors returned age and sex for 297,042, and only omitted wage returns from want of ability to state the facts with accuracy. The wage return, however, for 266,339 is so complete and satisfactory no fault can be found with the presentation. Estimates based on this table will be found on pages 755–780, Summary of General Statistics of Manufactures, and will be treated under that title. Attention is called to the notes on page 373. This presentation is divided into exhibits by industries, and each exhibit into four parts: I. Persons Employed, with Classification of Ages and Working Time;

II. Yearly and Total Wages for Day and Piece Hands; III. Working Time for Day and Piece Hands; and IV. Daily Wages for Day and Piece Hands. The recapitulations for these parts will be found on pages 749–754. The industries for which the points stated have been given are the following:—

MANUFACTURES.

Agricultural implements.
Arms and ammunition.
Artisans' tools.
Bags and bagging.
Book binderies.
Boots and shoes.
Boxes.
Brooms.
Building.
Carpetings.
Carriages and wagons.
Chemical preparations.
Clocks and watches.
Clothing.
Cotton goods.
Cotton and woollen and other textiles.
Dress trimmings.
Drugs and medicines.
Fertilizers.
Food preparations.
Furniture.
Glass.
Leather.
Linen.
Liquors and beverages.
Lumber.
Machines and machinery.
Metals and metallic goods.
Musical instruments and materials.
Oils and illuminating fluids.
Paper.
Polishes and dressings.
Printing and publishing.
Railroad construction.
Rubber.
Scientific instruments and appliances.
Stone.
Tobacco.
Vessels.
Wooden goods.
Woollen goods.
Worsted goods.
Miscellaneous manufactures.

OCCUPATIONS.

Blacksmithing.
Bleaching and dyeing.
Boot and shoe making and repairing.
Bottling.
Building moving.
Butchering.
Carpentry and joinery.
Clock, watch and jewelry repairing.
Clothes making and repairing.
Clothing repairing and remodelling.
Coopering.
Dress making.
Glass and china decorating.
Glazing, painting, paper hanging, etc.
Gilding.
Harness and saddle repairing.
Machinists' work.
Masoning and plastering.
Millinery.
Painting.
Paper hanging.
Plumbing and gas fitting.
Roofing.
Stair building.
Stone cutting and dressing.
Tinsmithing.
Upholstering.
Vessel and boat repairing.
Wheelwrighting.
Miscellaneous occupations.

On pages 751 and 752 are given recapitulations by which the average yearly and total wages paid in each of the above industries are shown. These averages are drawn from the actual working time and actual wages paid, and not from any computation based on a weekly wage. From these recapitulations we draw the following

condensed tables of average yearly and total wages paid in the leading industries of the State :—

INDUSTRIES.	Average Yearly Wages.				Total Wages paid during the Year ending May 1, 1875.
	Both Sexes, all ages.	Males above 15.	Females above 15.	Both Sexes, under 15.	
MANUFACTURES.					
Agricultural implements,	$680 85	$681 63	–	$225 00	$800,686
Arms and ammunition,	662 69	702 48	$238 44	–	734,264

Wheelwrighting,	594 91	594 91	–	–	161,817

These tables are exceedingly instructive and thoroughly incontrovertible. From them it appears that the highest yearly wages are paid in the manufacture of musical instruments and materials, $866.09, while the lowest is in the manufacture of bags and bagging, $249.59. It will be noticed that the total wages paid in the manufacture of boots and shoes and in cotton goods is very nearly the same, being $18,727,124 in the first named and $18,717,286 in the second. The average yearly wages in the first, however, are $455.05; in the latter, $333.15.

A Summary of General Statistics of Manufactures (pages 756–780), brings into juxtaposition, first by towns and then by

industries, the chief points already shown, namely: the number of establishments of manufactures and occupations, number and actual power of steam engines, number and nominal power of water wheels, number of persons employed, capital invested, estimated wages, stock used, goods made and work done. The SUMMARY enables one to make comparisons and calculations without the labor of research, and will be found a useful and convenient table. The column in this table entitled estimated wages, is perhaps the principal feature of it; it exhibits, first by towns and then by industries, the estimated wages of the whole 308,963 persons employed on the basis of the wages given for 266,339. The total wages paid this latter number, as actually returned, as stated, was $126,711,583; on the same basis, it was $146,159,826 for the number actually employed. An estimate of wages for 308,963 persons, based on the actual wages of 266,339, can not vary materially from the facts, had they been reported, and is, to our mind, as valuable.

The following table exhibits the basis of the estimates referred to, showing, in each industry, the whole number of persons employed, the whole number for whom wages have been returned, and the deficiencies. It will be seen that in a majority of instances the deficiency is trivial, and always, in relation to the whole number, too small to vitiate the statements made.

Under SPECIAL STATISTICS OF MANUFACTURES AND RELATED OCCUPATIONS (page 781) will be found various presentations.

First. *Machinery for Cotton, Woollen and Worsted Goods, by Towns* (pages 785–787). In cotton mills there are 3,859,237 spindles, 80,964 power looms, and 30 hand looms; in woollen mills, 1,383 sets of machinery, 8,412 power looms, and 131 hand looms; in making worsted goods, 191 sets of machinery, 5,114 power looms, and 3 hand looms. Besides these, but not called for by the census schedules, and not appearing in the tables, there were returned 15,606 spindles and 605 looms used in making linen and gunny cloth; 500 spindles in silk works; 288 webbing looms; 2,194 braiding machines; 82 power and 6 hand knitting machines. The number of spindles in cotton mills in 1865 was 1,913,756; in 1855, 1,519,527; and in 1845, 817,483.

Second (pages 791–797). *Saws in Lumber Mills, Vats in Tanneries, Engines and Machines in Paper Mills, Runs of Stone in Grist and Flouring Mills.*

Third. *Newspapers* (pages 801–811). In this presentation every periodical in existence in the State, May 1, 1875, is given, with date of establishment, subscription price, to what object devoted, how often published, etc. We are not aware that a single paper has been omitted. The whole number returned is 341, including 26 dailies, with an annual circulation of 83,389,028 copies; 222 weeklies, with circulation of 47,650,250 copies annually; 58 monthlies, with annual circulation of 7,504,224 copies. The 341 periodicals circulate 141,774,382 copies annually. On page 810 will be found a

recapitulation of objects to which periodicals are devoted, and on page 811 the dates of establishment, by which it is seen that the oldest paper was established in 1768; this is the "Essex County Mercury," a weekly paper published in Salem.

Fourth. *Gas Companies* (pages 815–817). There are 57 establishments, with a capital stock of $10,120,350, and a product of $4,471,874.

Fifth. *Ship Building* (pages 821, 822), by which we learn that during 1875 there were built 102 vessels, of all kinds, valued at $3,161,995.

Sixth. *Women Furnished with Work at Home, by Towns* and *by Industries* (pages 825–828). The number of women doing work at home for whom wages were given was 30,916, and their wages for the year ending May 1, 1875, were $1,528,532, a yearly average of $49.43; and they consumed $1,967,517 worth of stock, and produced $3,233,260 worth of goods. These two latter amounts are not perfectly reliable, but the most careful revision has enabled the office to give them as the minimum. The number of women employed, and their wage returns, are trustworthy. The value of stock used and goods made, as stated, is undoubtedly less than the truth. It is extremely difficult to give accurate returns, for the stock is usually given out, and the goods made are invoiced with the bulk used and made in the factory by the establishments making the returns.

Fishing (pages 831–837). This exhibit is not satisfactory. By it there is $7,269,442 invested in the fisheries, producing annually $7,684,716 worth of products. This is probably not the whole truth. The difficulty in the way of correct returns of fisheries is that the census is taken at the very time of year when our fishermen are the most active, their vessels away, and no adequate means of obtaining the facts remaining. The statistics presented, however, are as complete as possible under the circumstances. In 1865 the product of the fisheries was $14,618,307 currency (gold at 1.57). In 1875 there were 6,656 persons employed in the fisheries, of which number 1,018 were paid wholly by wages, 1,337 partly by wages and partly by share in the profits, 3,024 wholly by share in the profits; 277 owned stock in the vessels they went in.

Coastwise and Ocean Commerce (pages 841–845). This is imperfect for similar reasons given under "Fishing." The ton-

nage reported was, in 1875, 343,013 for 1,051 vessels, and they received for freight $3,164,845. The amount received for freight in 1865 was $11,344,394. In 1865 the whole number of vessels engaged in the fisheries and in coastwise and ocean commerce was 2,533, with a total tonnage of 451,818. In 1875 the whole number of vessels so engaged was 2,274, with a tonnage of 422,895. While the total number of vessels and the total tonnage in 1865 and 1875 are shown to be nearly the same, the products of fisheries and amount of freight received differ widely, as stated. As shown by returns to the National Bureau of Statistics, the number, kind and tonnage of vessels giving Boston as their home port are as follows :—

KIND OF VESSELS.	Number.	Tonnage.
Brigs,	119	32,378.77
Barks,	225	113,881.43
Schooners,	603	89,163.82
Ships,	208	249,076.53
Steamships,	1	1,062.80
Screw steamers,	60	15,805.89
Paddle steamers,	25	10,719.23
Sloops,	89	2,447.06
Yachts,	7	292.10
Steam yachts,	2	37.41
Steamers,	13	6,845.89
Barkentines,	3	1,635.91
Tugs,	2	79.78
Totals,	1,357	523,426.62

For the balance of the State, the returns, as stated in the Census, are quite complete; but, for the reasons given, we do not hesitate to say that the statistics of Fishing and Commerce are decidedly weak; in fact, are the least trustworthy of any of the presentations made in this volume.

Publishing. While publishers gave excellent returns as to the aggregate value of their publications, they found a difficulty in complying with the requirements of the Census, relating to the number of copies of books and pamphlets published, and some other points, compliance with which would have resulted in information of great value to all engaged in an industry producing, in 1875, goods to the amount of $12,120,674.

RESERVOIRS, used for manufacturing purposes, are distributed as follows :—

A number of establishments often take their power from the same reservoir.

Team Work. By team work is meant a species of work made use of to some extent in manufacturing boots and shoes, and, in some instances, in other industries, and signifying a combination of men where the labor of all—each doing a particular part—is necessary to the production of a single article. The "team" is usually hired by a superior workman, who takes sub-contracts from the proprietor, and makes a profit on the labor of each man in the team. The total number of these teams in the State is 1,260, having 4,500 men working in them.

In the Appendix (pages 847–912) are eight tables. Table I. gives by towns the valuation, real and personal, the products of agriculture and mining and of manufactures and fisheries with total products and total valuation, in juxtaposition, while in a similar way Table II. presents the population (males and females) and persons employed in manufactures (by sex), all for the year ending May 1, 1875. These, with Tables III. *(Occupations by Name for 1875)* and IV. *(Occupations by Name, with Ages, for 1875)*, furnish

the means for ready comparison on all essential points presented in Vols. I., II. and III. for 1875. Tables V., VI., VII. and VIII. relate to *Manufactures by Towns*, *Occupations by Towns*, *Fishing and Commerce by Towns*, and *Manufactures*, *Occupations and Fishing and Commerce by Name*, all for 1865, from tabulations made in this office from the census returns for 1865. This became necessary, in order to establish a basis for comparison in leading matters.

The total products for 1875 are shown to be, in currency, as follows :—

Manufactures and fisheries,	$600,016,678
Agriculture and mining,	43,461,599
Aggregate,	$643,478,277
For 1865 :—	
Manufactures and fisheries,	$444,524,353
Agriculture and mining,	51,149,576
Aggregate,	$495,673,929

These values should be reduced to a gold basis, in both years, in order to be of any service in comparison, *as values*. Of course, the only true comparison in products must be by quantity produced, and this has been done, as far as the returns in former years would permit, in the appropriate place in this introduction, under *Principal Manufactures* for 1845, 1855, 1865 and 1875. On a basis of gold values, the products of the State for 1875 and 1865 were as follows :—

For 1875 :—	
Manufactures and fisheries,	$535,729,176
Agriculture and mining,	38,804,999
Aggregate,	$574,534,175
For 1865 :—	
Manufactures and fisheries,	$283,136,530
Agriculture and mining,	32,579,347
Aggregate,	$315,715,877

From this it is seen that a gain of $258,818,298, or 82 per cent, on a gold basis, has been made in the productions of the State since 1865. The population, in the same time, increased from 1,267,030

to 1,651,912, a gain of 384,882, or 30.38 per cent. The proportion of property, real and personal, according to valuation, to products, was as 3 to 1 in 1875, and as 2 to 1 in 1865.

The TABULAR INDEX (pages 913–935) will be found valuable for its alphabetical arrangement of the cities and towns in the State, with the county in which each is located following, as well as for its ordinary value as an index.

Since the printing of the tabular portion of this volume, a careful revision has been made of the various presentations, with a view to discover such errors as had been overlooked previous to printing. Those found are few in number and of no great importance.

A few occupations not properly productive appear in the town presentations; the following should have been omitted: "Dentistry" in Dartmouth, page 20, Princeton, page 165, and Southbridge, page 167; "Trucking" in Lawrence, page 39; "Laundry work" in Springfield, page 69; "Road-making" in Malden, page 96; "Turntable moving" in Ashburnham, page 146; "Horse-clipping" in Berlin, page 149. These occupations represent a value of only $43,065, or less than a hundredth of one per cent of the total products of Manufactures. In Lawrence, page 39, the line, "Comb repairing machine" should read "Repairing machine combs." In Canton, page 114, the line "Smalt" should read "Preparing smalt." "Oil clothing" in Rockport, page 47; "Mast hoops," Acton, page 82; and "Flavoring extracts" in Marshfield, page 130, should more properly come under the heading of Manufactures in their respective towns.

On page 64, for "Town of Holyoke" read "*City* of Holyoke."

The head-note to the presentation, "Motive Power, by Towns," page 319, is not correctly worded. The table actually shows the *number* of steam engines, water wheels, horses, men and women running machines by hand or foot power, and the number of windmills.

On page 809, in the table entitled "Number by Periods of Issue," 222 should take the place of 221 in the column headed "*weekly*."

MANUFACTURES AND RELATED OCCUPATIONS.

BY NAME.

MANUFACTURES AND OCCUPATIONS BY NAME.

[The figures given in each presentation of manufactures by name are the consolidated returns for the articles enumerated under each heading. The classification adopted is that established in the Industrial Statistics Schedule, which, by the provisions of Chap. 386, Acts of 1874, became part of the Census laws. The quantity and value of each article made in the State is given in the presentation in this volume, entitled "Articles made: by name."]

MANUFACTURES.—ARMS AND AMMUNITION.

[Bayonets, dualin, exploders, firearms, giant-powder, gun-cotton, gunpowder, hunting tackle, metallic and other cartridges, nitro-glycerine, ordnance, pistols, projectiles, swords, tompions, torpedoes, etc.]

Counties, Cities and Towns.	Establishments.	Capital invested.	Value of goods.

RECAPITULATION (By Counties).

The State,	220	$63,844,708	$77,934,753
Berkshire,	20	3,372,200	4,982,042
Bristol,	53	25,195,942	24,873,515
Essex,	16	7,721,000	9,285,694
Franklin,	6	521,500	495,000
Hampden,	16	6,019,500	8,296,112
Hampshire,	6	1,817,400	1,577,249
Middlesex,	16	10,815,096	17,908,557
Norfolk,	14	665,250	983,519
Plymouth,	4	336,000	261,827
Suffolk,	11	872,975	1,647,924
Worcester,	58	6,507,845	7,623,314

Food Preparations.

[Bread, broma, butter, carrageen, crackers, cured and packed meats, coffees, cheese, cocoanut cakes, cocoa, cocoa shells, cocoa butter, chocolate, corn balls and cakes, condensed milk, confectionery, dessicated fish, dried meats, dried sweet corn, dried apples and other fruits, essences, flour and meal, flavoring extracts, gelatine, hen feed, head cheese, hermetically sealed goods, hulled corn, ice cream, lard, maple sugar and molasses, oleomargarine, packed and cured fish, pastry, pop corn, preserves, pickles and sauces, prepared animal food, prepared cocoanut, refined sugar, refined molasses, sausages, salt, spices, vinegar, yeast, etc.]

The asterisk indicates that in the towns so marked, the capital invested in the joint businesses of lumber-sawing and grain-grinding has been divided between the two industries. In such cases a saw and grist mill is counted both under "Food Preparations" and "Lumber" as an establishment, and the proportional capital is given for each. The meal, flour and feed made in these establishments represents a value of only $285,437.

LUMBER.

[Clapboards, hoops, headings, laths, piles, planed lumber, sawed lumber, shingles, staves and shooks, etc.]

The asterisk indicates that in the towns so marked, the capital invested in the joint businesses of lumber sawing and grain grinding has been divided between the two industries. In such cases, a saw and grist mill is counted both under "Lumber" and "Food Preparations" as an establishment, and the proportional capital is given for each. The lumber sawing in these establishments represents a value of only $222,167.

Wool carding, stapling, washing, etc.,	19	186,710	202,656
Woollen and worsted frame knitting,	2	525	732

RECAPITULATION OF AGGREGATES.

[Manufactures marked with an asterisk are given in detail by towns on pages 189-221. Those marked with a dagger are given with details of classification (but not by towns) on pages 221, 222. The totals are the state aggregates drawn from those presentations. The figures given for "Miscellaneous Manufactures" are the aggregated totals of those branches of manufacture given under a similar heading on pages 223-225. The figures given for "Occupations" are the aggregated totals of all occupations given under a similar heading on pages 226-228. The figures on those pages, 223-228, are also state totals, drawn from the presentation of Manufactures and Related Occupations by Towns (pages 3-178), but were not deemed of sufficient importance to receive a more detailed showing. Duplications, as regards number of establishments, in Food Preparations (page 199) and Lumber (page 206) have necessitated the dropping, in this recapitulation, of 51 establishments for the former and 50 for the latter presentation.]

Manufactures and Occupations.	Establishments.	Capital invested.	Value of goods.
Arms and ammunition,*	20	$964,300	$1,502,841
Agricultural implements,*	38	1,144,475	2,365,004

ARTICLES MADE.

BY NAME.

ARTICLES MADE: BY NAME.

[In this presentation, each separate article of manufacture is specified by name, and the total value of each, for the State, is given. In the majority of instances the quantity of each article made is also given, and is accompanied by the average value for the unit of measurement. The figures are drawn exclusively from the returns classified as Manufactures.]

Articles Made.		Quantity.	Value.	Average Value.
Agricultural implements,		–	$378,786	–
Alcohol,	bbls.,	10,000	600,000	$60 00
Ale,	bbls.,	308,367	1,899,302	6 16
Ale and porter,	bbls.,	60,514	535,000	8 84
Alphabet blocks,	boxes,	15,000	4,000	27
Anchors, heavy,	tons,	295	40,575	137 54
Anchors, boat, and boat iron work,	lbs.,	2,500	340	14
Anchors, boat, and clothes drying reels,		–	1,000	–
Apple parers,	doz.,	2,000	11,000	5 50
Apple sauce,		–	300	–
Artificial flowers,		–	4,887	–
Artificial limbs,		–	12,975	–
Artificial building stone,		–	13,500	–
Artificial stone work,		–	5,800	–
Artificial teeth and dental goods,		–	157,418	–
Artificial wood ornaments,		–	50,000	–
Artists' materials,		–	4,672	–
Augers and bits,		–	85,400	–
Awls,	gross,	39,706	37,525	95
Axes,	doz.,	45,463	591,100	13 00
Axes, boys', and hatchets,	doz.,	4,000	21,100	5 28
Bagging, cotton,		–	160,000	–
Bags, cotton,		1,100,000	150,000	14
Bags, cotton duck,		245,675	40,915	16
Bags, cotton and jute,		–	216,000	–
Bags, paper,		–	130,745	–
Bags, travelling,		–	3,000	–
Baking powders,	lbs.,	800	400	50
Balances and scales,		–	37,000	–
Base balls,	doz.,	20,000	60,000	3 00
Baskets,		382,787	177,178	46
Baskets and frames, straw,		–	1,425	–
Beavers,	yds.,	403,187	922,713	2 29
Bedsteads,		6,212	18,500	2 98
Beef, salt,	bbls.,	2,191	38,059	17 37
Bells, church, factory, etc.,		–	52,500	–
Belt lacings,	b'ches,	5,100	5,100	1 00
Belting, leather,	feet,	908,506	363,503	40
Belting, loom straps, etc.,		–	11,115	–
Billiard tables,		598	168,600	281 94
Billiard, bagatelle and sippio tables,		–	31,855	–
Billiard table legs,		–	12,480	–
Billiard table frames,		100	6,250	62 50
Billiard time and price registers,		60	1,000	16 67
Billiard cues and balls,		–	6,645	–
Bit braces,		87,843	90,000	1 02
Blacking and dressing, leather,		–	196,600	–
Blacking, shoe manufacturers' edge,	bbls.,	1,517	23,500	15 49
Blacking, shoe manufacturers' edge,		–	40,250	–
Blank books,		–	496,100	–
Blasting materials,		–	78,000	–
Bleaching, dyeing and calendering,		–	1,167,911	–
Blinds, doors and sashes,		–	1,226,297	–

STOCK USED.

BY INDUSTRIES.

STOCK USED: BY INDUSTRIES.

[The classification of manufactures in the following presentation is the same as that used on pages 223-225 and page 229, thus affording opportunity for comparison between "stock used" and "goods made." The value of stock used was not returned for several industries of minor importance, and they do not appear in this presentation. The value of stock used was not called for in those branches of industry designated on pages 226–228 as "Occupations."]

Manufactures.	No. of Establishments.	Value of stock used.
Arms and ammunition,	20	$421,047
Agricultural implements,	38	365,586
Artisans' tools,	124	831,980
Bags and bagging,	5	528,282
Boots and shoes,	1,461	54,976,504
Boxes,	157	1,351,241
Brushes and brooms,	52	526,670
Building,	330	3,451,545

SELECTED STOCK.

BY TOWNS.

SELECTED STOCK.

[The following presentation shows the consumption of the principal articles of stock in the principal cities and towns. In all cases, the value of the article used is given. In some cases, the quantity used is also specified. Explanatory notes are inserted, when deemed necessary, under the title head which denotes the kind of stock. The names, quantities and values of all kinds of stock used in the State are given in the presentation in this volume entitled, "Stock Used: by Name."]

Woollen and worsted goods,	–	10,228,342
Total value,	–	$166,981,069

STOCK USED.

BY NAME.

STOCK USED: BY NAME.

[In this presentation, each separate article of stock used is specified by name, and the total value of each, for the State, is given. In the majority of instances the quantity of each article used is also given, and is accompanied by the average value for the unit of measurement. The figures are drawn exclusively from the returns classified as Manufactures.]

Articles Used.	Quantity.	Value.	Average Value.
Acids, carboys,	3,745	$3,800	$1 01

VALUES OF BUILDINGS USED FOR MANUFACTURING PURPOSES; OF AVERAGE STOCK ON HAND; OF ALL MACHINERY; AND OF IMPORTED MACHINERY.

BY TOWNS.

VALUES OF BUILDINGS, STOCK ON HAND AND MACHINERY.

[The figures given in this presentation as the values of buildings, stock on hand and machinery, are drawn exclusively from the returns classified as Manufactures. Out of the 10,915 manufacturing establishments, but 175 failed to answer at least one of these inquiries. The value of buildings was returned by 7,236 establishments; value of average stock on hand, by 8,845; value of machinery, by 7,121; and value of imported machinery, by 730. The value of imported machinery is included in the column headed "Value of Machinery."]

STEAM AND WATER POWER.

NOMINAL AND ACTUAL HORSE POWER.

BY INDUSTRIES.

STEAM AND WATER POWER: BY INDUSTRIES.

[In the following presentation of horse power by industries, indefiniteness in the returns has compelled the dropping of 14 steam engines and 221 water wheels from the classification.]

STEAM POWER.

Industries.	Engines.	Nominal Horse power.	Actual Horse power.
Agricultural implements,	13	597	1,158
Arms and ammunition,	8	352	683
Artisans' tools,	23	251	487
Bags and bagging,	2	325	630
Boots and shoes,	242	4,454	8,641
Boxes,	52	1,674	3,247
Building,	39	1,014	1,967
Carpetings,	10	1,210	2,347
Carriages and wagons,	30	591	1,146
Chemical preparations,	8	154	299
Clocks and watches,	3	14	27
Clothing,	35	1,280	2,483
Cotton goods,	134	20,895	40,536
Dress trimmings,	3	24	46
Drugs and medicines,	3	85	165
Dyestuffs,	2	450	873
Fertilizers,	8	376	729
Food preparations,	97	3,240	6,285
Furniture,	77	2,797	5,426

Persons Employed in Manufactures and Occupations, with Classification by Sex, Age, Etc.

BY TOWNS.

PERSONS EMPLOYED: BY TOWNS.

[This presentation gives the whole number of persons, in the various towns, employed in manufacturing and mechanical industries during the year ending May 1, 1875. The figures presented under "Manufactures" are drawn from the returns of manufacturers, and those under "Occupations" from the returns of other employers. These are combined under "Manufactures and Occupations," to obtain the town or city totals. The numbers given in the fourth to ninth columns, both inclusive, in the three parts of the presentation, are comprehended in the first three columns. As regards women furnished with work at home, in many cases work was so supplied to women living in other towns than where the establishment was situated. The figures in the tenth column are not included in those given in the third column.]

MANUFACTURES.

Counties, Cities and Towns.	Whole No. of Persons Employed.	Males—Total Number.	Females—Total Number.	Married Females.	Males between 10 and 15 years of age.	Females between 10 and 15 years of age.	Males under 10 yrs. of age.	Females under 10 years of age.	Both Sexes, under 15, employed for more than nine mths. in the year.	Number of women furnished with work at home.

PERSONS EMPLOYED AND WAGES.

BY TOWNS.

PERSONS EMPLOYED AND WAGES: BY TOWNS.

[In this presentation only those persons for whom wages were returned are given. In the presentation on page 339, "Persons Employed: by Towns," the whole number of employés is given without regard to wages. To learn the connection between this presentation and that on page 371, which relates to persons employed and wages by industries, see explanatory note on page 373.]

PERSONS EMPLOYED IN MANUFACTURES AND OCCUPATIONS.

WITH CLASSIFICATION BY SEX, AGE, ETC.; RUNNING TIME IN MANUFACTORIES; DAILY AND YEARLY WORKING TIME; AND DAILY, YEARLY AND TOTAL WAGES FOR DAY AND PIECE HANDS.

BY INDUSTRIES.

PERSONS EMPLOYED AND WAGES: BY INDUSTRIES.

[In the presentation on page 339 of this volume, entitled "Persons Employed, by Towns," the returns made by manufacturers and other employers of the number of persons in their employ are given. The entire number borne on the schedules are there presented, with a classification showing the respective numbers engaged in Manufactures and Occupations, and with other particulars concerning sex, ages, married females, children unlawfully employed, and women supplied with work at their homes.

In the presentation on page 361, entitled "Persons Employed and Wages, by Towns," the distinctions relating to Manufactures and Occupations are dropped, and only those are accounted for, for whom wages were returned. The presentation, therefore, gives the whole number of persons for whom yearly wages were given in each town or city, and the amount of the wages. The persons employed are therein divided into male employés above 15 years of age, female employés of a similar age, and employés of both sexes under 15 years of age.

The following presentation relates to persons employed, working time, wages, etc., with reference to industries. Each showing for an industry is divided into four parts, which are consecutively numbered. The first one contains, beneath the name of the industry, a descriptive note which enumerates the kind of articles made by the persons to whom the figures given in the tables relate. In making the tabular showing for each industry, only those persons are accounted for in part I., for whom the information presented in that part was given. Besides, in all cases where only one person was returned in an industry, for a town, the person and particulars have been dropped from part I. It will thus be seen that if the persons employed in all the industries in a particular town, as given in the succeeding tables, are added together, the total will compare with the town presentation given on page 361 and not with that given on page 339. The preceding explanation serves to show that the number for whom wages were reported was smaller, in many towns, than the number returned as being employed.

The classifications of sex, married females, and ages given in each part I. will be readily comprehended. The column headed "hours worked per day," refers to the average daily working time of employés. The one headed "days that establishments were open," indicates the proportion of the year during which work was in progress in the various establishments.

The second part of each presentation contains columns showing the number of males and females for whom the data of average working time and daily wages were given. All deficiencies in the returns operated, of course, to render the totals of these columns less than those of "persons employed" in the first part of the presentation.

The remaining columns in part II. give the average yearly wages (for day and piece hands classified by ages) for each individual, and the total wages for all. It will be seen that the yearly and total wages given in part II. are derived from the details for average yearly working time and daily wages which are given in parts III. and IV.]

MANUFACTURES.

AGRICULTURAL IMPLEMENTS.

[Apple parers, apple pickers, cradles, cultivators, dibbles, feed cutters, garden rakes, harrows, hay cutters, horse rakes, horse hoes, hoes, hay tedders, hones, rifles and whetstones, mowing machines, mowing and reaping machine knives, mowing and reaping machine attachments, mowing and reaping machine sections, pruning knives, ploughs, potato diggers, rakes, reaping machines, scythes, scythe snaths, seed sowers, stump pullers, shovels, spades, tree protectors, winnowing machines, yokes, etc.]

RECAPITULATIONS OF AGGREGATES—Con.

[The State aggregates of the totals contained in Part II. of each showing by industries are brought forward in this recapitulation. In presenting the average yearly wages, the recapitulation does not show the day and piece hands separately. From the data given in Parts III. and IV. in each showing by industries, the average yearly wages for day and piece hands, with regard also to sex and age, can be computed for any desired town, for each county, or for the State. The average yearly wages for Miscellaneous Manufactures and Occupations will be found at pages 587 and 740.]

Part II.—Average Yearly and Total Wages.

INDUSTRIES.	WORKING TIME AND WAGES GIVEN FOR,—			AVERAGE YEARLY WAGES.				Total Wages paid during the Year ending May 1, 1875.

FISHING.

BY TOWNS AND NAME.

FISHING.

[This presentation is wanting in completeness. The extent of its imperfection, and the reasons therefor, are given in the introduction, under the title "Fishing." In this presentation, especially in the classification by name, it has been impossible to bring the proportional figures for capital invested, vessels engaged and tonnage opposite the identical products where they belong. Those figures marked with an asterisk are put where they are as being in connection with the *largest* product, but other products were taken by the use of such capital, vessels and tonnage.]

BY TOWNS AND NAME.

Products.	Quantity.	Value.	Capital Invested.	Vessels Engaged in.	Tonnage.	Value of Salt consumed.

COASTWISE AND OCEAN COMMERCE.

COASTWISE AND OCEAN COMMERCE.

[This presentation is wanting in completeness. The extent of its imperfection, and the reasons therefor, are given in the introduction under the title, "Coastwise and Ocean Commerce." In the city of Newburyport, the value of vessels owned by foreigners and engaged in ocean commerce is $600, or one per cent. In the city of Boston, foreigners own vessels worth $173,334 (5 per cent) engaged in coastwise commerce, and vessels worth $3,188,750 (80 per cent) engaged in ocean commerce. These values combined give $3,362,084, or 46 per cent of the whole value for Boston. In Provincetown, Barnstable County, the value, ownership and amount received for freight for 249 vessels were not given. In Boston, Suffolk County, the tonnage of 78 vessels was not returned, and 89 vessels were described as being engaged in both coastwise and ocean commerce.]

BY TOWNS.

Counties, Cities and Towns.	No. of Vessels.	Tonnage.	Value.	Amount Received for Freight.	Percentage of Vessels owned by citizens of Mass.	Value of such Percentage.	Percentage of Vessels owned by other American citizens.	Value of such Percentage.

TABLE II.—*Population and Persons Employed in Manufactures and Mechanical Industries for 1875.*

[For purposes of comparison, the population presentation, with sex, and that part of the presentation of classified occupations which relates to persons employed in manufactures and mechanical industries are reproduced from Vol. I. of the Census, "Population and Social Statistics." It should be remembered that the figures for "persons employed" are based upon the statements of individuals (who may have been at work or not) as to their occupations, and not upon the employers' statements of persons actually employed by them.]

TABLE V.—*Manufactures by Towns for 1865.*

[The town totals given in this table are drawn from the Bureau tabulation of the returns of manufactures made by the Census of 1865. County and State totals only were given in the abstract printed at that time. In comparing figures given in this presentation with those of 1875, it must be remembered that many changes in town areas, names, etc., have taken place since 1865. The following notes will be of value in making the comparisons referred to: *Barnstable County.*—The town of Mashpee was not incorporated until 1870. *Dukes County.*—Gay Head was formed, in 1870, from a part of Chilmark. *Essex County.*—A part of Amesbury was set off in 1876, and called Merrimac. The name of South Danvers was changed to Peabody in 1868. *Middlesex County.*—Ayer was formed from a part of Groton, in 1871. Brighton and Charlestown were annexed to Boston in 1873. Everett was made from a part of Malden in 1870. Hudson was formed from parts of Bolton (Worcester County), Marlborough and Stow, in 1866. Maynard was made from parts of Stow and Sudbury in 1871. The name of South Reading was changed to Wakefield in 1868, and that of West Cambridge to Arlington in 1867. *Norfolk County.*—Dorchester was annexed to Boston in 1869. Holbrook was set off from Randolph in 1872. Parts of Dorchester, Dedham and Milton were taken to form Hyde Park in 1868. Parts of Wrentham, Franklin, Medway and Walpole were made into the town of Norfolk in 1870. Norwood was formed from parts of Dedham and Walpole in 1872. Roxbury was annexed to Boston in 1867, and West Roxbury became part of that city in 1873. *Plymouth County.*—The name of North Bridgewater was changed to Brockton in 1874. Rockland was set off from Abington in 1874. South Abington was formed from parts of Abington and East Bridgewater in 1875. *Suffolk County.*—The annexations to Boston are given previously. The name of North Chelsea was changed to Revere in 1871.]

TABLE VI.—*Occupations by Towns for 1865.*

[The town totals given in this table are drawn from the Bureau tabulation of the returns of occupations made by the Census of 1865. They were not designated as "occupations" in 1865; the distinction has been made in order to allow of comparison between 1865 and 1875. The schedule of 1875, however, included many more of productive occupations than that of 1865. As in the case of manufactures, only county and State totals were presented in the abstract of the Census of 1865. It being impossible to subdivide the item of "capital invested," the figures given in the third column in this table include the capital invested in "occupations" and also that invested in vessels engaged in fishing and commerce. For changes in town areas, names, etc., see head-note to Table V. of this Appendix.]

TABLE VII.—*Fishing and Commerce by Towns for 1865.*

[The town totals given in this table are drawn from the Bureau tabulation of the returns of fishing and commerce made by the Census of 1865. County and State totals only were given in the abstract printed at that time. For "capital invested," see head-note to Table VI., of this Appendix. For changes in town names, areas, etc., see head-note to Table V.]

TABLE VIII.—*Manufactures, Occupations and Fishing and Commerce, by Name, for 1865.*

[This table is made up from the Bureau tabulations of the Census returns of 1865, relating to manufactures, occupations, fishing and commerce. This detailed classification of articles by name has been made in order to allow of particular comparison with the similar presentation for 1875. Products not specified by name in the 1865 returns are not included.]

MANUFACTURES.
